

PERSONA OF “RECICLO”
PERSONA

PERSONA

Name: Ahmed Hassan

Age: 30

Occupation: Office Employee

Location: Cairo

Marital Status: Single / Young professional

LIFESTYLE:

Ahmed has a busy daily routine between work and home. He prefers solutions that are simple, convenient, and save time. He is interested in environmentally friendly practices but does not want to put in extra effort or complicated steps.

CURRENT BEHAVIOR

Ahmed usually throws all household waste together. Occasionally, he may keep certain items like plastic bottles or used cooking oil separately, but this behavior is not consistent.

MOST COMMON WASTE TYPES

- Plastic bottles
- Paper and cardboard
- Food waste

PAIN POINTS

- Lack of a clear and accessible recycling system
- Limited recycling facilities nearby
- Waste sorting can feel confusing if it requires too many steps
- Lack of time and motivation
- Low trust in some waste collection services

MOTIVATIONS

- Contributing to environmental protection
- Reducing unnecessary waste
- Receiving clear benefits or rewards for recycling efforts

INCENTIVES

- Ahmed is more likely to participate in recycling if there are rewards such as:
 - 💰 Direct monetary rewards
 - ★ A points system
 - 🛍️ Coupons or discounts
 - Redeemable products

APP EXPECTATIONS

- Ahmed prefers an app that is:
 - Simple and easy to use
 - Requires minimal steps
 - Clearly explains recyclable materials
- Important Features
 - Waste collection scheduling
 - Rewards wallet or points system
 - Order tracking
 - Clear recycling guidelines
 - photos for every category
- Important for him:
 - The reward should be clear, valuable, and flexible.

PREFERRED COLLECTION METHOD

Ahmed prefers:

- Home pickup service
- A fixed and reliable schedule

He does not prefer traveling to drop-off locations.

RETENTION FACTORS

Ahmed will continue using the app if:

- The process is simple and convenient
- Rewards are meaningful
- The service is reliable and organized

He may stop using it if:

- The app becomes complicated
- There are no clear benefits
- Collection schedules are inconsistent

USER QUOTE

“If it’s easy and there’s something in it for me, I would definitely use it.”

LET'S LEARN ABOUT

EMPATHY MAP

SAYS

- “Nothing reminds me to recycle.”
- “I wish there was a simple system that helps me recycle.”
- “I need to clearly see what materials can be recycled.”
- “Some people care about recycling, but most people don’t really understand it.”
- “I don’t see a clear or immediate benefit from recycling.”

THINKS

- Recycling would be easy if there was a clear and simple system.
- Recycling companies may not always be trustworthy.
- Environmental protection often seems like a priority for wealthier people.
- Many recycling apps feel complicated to use.
- Recycling can be a strong source of artistic inspiration.

DOES

- Throws away waste without separating it, or only separates a few simple materials.
- Separates waste when in public places that have a clear recycling system.

FEELS

- Feels lazy about sorting waste.
- Feels confused about how recycling works.
- Feels uncertain about what should be recycled.

LET'S LEARN ABOUT

USER JOURNEY MAP

1- Awareness

User Actions

- Sees social media ad
- Clicks to learn more
- Reads app description

User Thoughts

- “Is this service real?”
- “Will they actually pick up from my home?”

Emotions

Curious + Slightly skeptical

Pain Points

- Low trust in waste collection services
- Fear of complicated process

Opportunities

- Clear value proposition on first screen
- Real user testimonials
- Simple 3-step explanation

2-Consideration

User Actions

- Reviews features
- Checks rewards system
- Compares with alternatives

User Thoughts

- “How much can I actually earn?”
- “Will this take too much time?”

Emotions

Interested + Hesitant

Pain Points

- Unclear reward calculation
- Too much information

Opportunities

- Show real earning example (e.g., 1kg plastic = X points)
- Short explainer video

3-Sign Up

User Actions

- Creates account
- Enters personal info
- Enables location

User Thoughts

- “Why do they need this data?”
- “Please let this be quick.”

Emotions

Slight stress

Pain Points

- Long forms
- Too many steps

Opportunities

- Phone number quick sign-up
- Minimal required fields
- Skip optional steps

4-Waste Preparation & Understanding

User Actions

- Reads recycling guidelines
- Uses AI to identify waste
- Sorts recyclable items

User Thoughts

- “Is this plastic recyclable?”
- “Am I doing this correctly?”

Emotions

Mild confusion

Pain Points

- Sorting feels complicated
- Fear of doing it wrong

Opportunities

- AI image recognition
- Visual step-by-step guide
- “Top Recyclable Items” list

5-Request Pickup

User Actions

- Selects waste type
- Chooses date & time
- Confirms request

User Thoughts

- “Will they arrive on time?”
- “Is this reliable?”

Emotions

Hopeful + Slightly anxious

Pain Points

- Unclear schedule
- No confirmation

Opportunities

- Instant confirmation message
- Live tracking
- Clear ETA display

6-Pickup Experience

- Waits for agent
- Hands over waste
- Checks calculated rewards

User Thoughts

- “Will they calculate correctly?”
- “Is this organized?”

Emotions

Evaluative (Judging the service)

Pain Points

- Agent delay
- Unclear reward calculation

Opportunities

- Notification before arrival
- Transparent weight & reward display
- Professional agent behavior

7-Rewards & Impact

- Views wallet balance
- Checks earned points
- Considers redemption

User Thoughts

- “That’s actually worth it.”
- “I might use this again.”

Emotions

Satisfied + Motivated

Pain Points

- Low reward value
- Complicated redemption process

Opportunities

- Instant wallet update
- Easy redemption
- Environmental impact stats (e.g., “You saved 3kg of waste!”)

8-Retention Decision

Continues Using If

- Process is simple
- Rewards are meaningful
- Service is reliable

Stops Using If

- App becomes complicated
- Rewards unclear
- Pickup is inconsistent

CORE INSIGHT

Ahmed will adopt recycling only if it feels easier and more rewarding than throwing everything away
